In the could not marry a woman of indomitable places and a lively old Aber.

In the could not marry a woman of indomitable places and a lively old Aber.

In the could not married to give satisfaction.

It is a man of indomitable places and a lively old Aber.

In the could not married to give satisfactio

The Work of an Editor The London Times, speaking of the

work of an editor, says it can only be appreciated by those who have had the good fortune to have some expersence in it. The merest slip of the pen, an epithet too much, a wrong date, a name misspelt, or with a wrong initial before it, the misinterpretation of some subject perhaps incapable in interpretation, the most trilling of ceptibility of those who do not even ers, may prove not only disagreeable but costly mistakes, but they are about the least of the mistakes to which the editor is liable. The editor must be on the spot until the paper Is sent to press, and make decisions apon which not only the approval of the public but even great causes may hang. He cannot husband his strength with comparative repose in the solitate a study or the freshness of green fields. He must see the world, converse with its foremost or busines a fors, be open to information and on guard against error. All this should be borne in mind by those who claim that fournalism is not infallibly as curate, just and agreeable.

Says Ruskin: What do you think the beautiful word "wife" comes from? It is the great word in which the English and Latin languages conrouged the French and Greek. I hope the French will some day get a word for it instead of that femme. what do you think it comes from? The great value of the Saxon words is that they mean something. Wife means " weaver." You must either be housewives or house moths, remember that. In the deep sense you must either weave men's fortunes and embroider them, or feed upon and bring them to decay. Wherever a true wife comes, home is always around her. The stars may be over her head, the glow-worm in the night's clod grass may be the fire at her feet. out home is where she is, and for a noble woman it stretches out far with cedar or painted with vermilion shedding its quiet light for those ieve, is the woman's true place and

Stonewall " Jackson & Sister. Mrs. Arnold, the sole surviving six er of "Stonewall" She was throughout the war a bithful Unionist, although every member of the family except one-a young nephew-was a secessionist. brother she entertains the reverence of an undying love and affection, and the invists that it was with extremreluctance and profound misgiving that he took up arms against his coun try. He declared he would not go outside of Virginia to fight; he voted against the ordinance of secession in old Virginia, and urged his sister to ise her influence to keep West Virrininfust to the Union. A profoundly eligious man, he was wont to say,

ven after he had taken up the sword If we are right, God will bless us I we are wrong, God will destroy us

Willie Winters, the dramatic critic

Behind the unconscious grace

the melodious elecution, the ductile adaptibility to ever-changing moods of ingenuous ways, and the fissh and clangor of conflicting passions, pain in their expression-there is the lavalike temperament of strange, exota genius, sleepless, alert, vigilant, for ever consuming itself, f rever poten to light in human hearts the snark of aspiration that makes humantly godlike, and so redeems, the commonnes-
